

Jumbo Rivet Buster

TX-133 RB Series

The Texas Pneumatic Rivet Buster has improved features from current models available!

The TX-133RB is designed to operate at 90 PSI. It is built to use jumbo steel and upper/lower sleeve and can be converted to run standard steel if desired.

(To do this would require Arrow parts : 2101-15 upper sleeve, 2103-15 lower sleeve, and 2104 rubber bumper)

- ★ *Positive retention of rivet buster piston to prevent possible injuries.*
- ★ *Guaranteed to be of the highest quality. American high tech made! Tenths of thousands clearance on the valve assembly.*
- ★ *Most reasonably priced replacement valve assembly in the entire tool industry! Most reasonably priced parts on the tool and interchanges with compatible rivet busters.*
- ★ *Uses a steel throttle valve.*
- ★ *Two-step piston design.*
- ★ *Barrel cylinder has a bridge built in for safety - piston will not fall out or be shot out of tool avoiding personal injury.*

2

EXTRA FEATURES...
